

Monitor, Manage & Protect.

Technical expertise combined with proven methodologies makes Mainstream an ideal partner to balance IT risk, governance, compliance and security.

Mainstream balances the cost of governance, risk and security controls with your financial realities to craft a risk management solution that meets your needs. We also ensure that the connection between IT security and strategic goals is clear and communicated across your enterprise.

Governance

Good governance is the cornerstone of a solid security practice, providing a solid foundation for risk management and compliance. Mainstream's Governance Consulting Services empower your team to build strong, scalable governance policies

- Incident response program development
- Security program development
- Data discovery mapping

Risk

The integrity of critical business processes is dependent upon the safety of IT systems and data. Moreover, showing your clients that you have risk under control is crucial to your relationships and reputation.

- Risk Audit
- ISO program development
- ISMS development

Compliance

Failure to establish effective security compliance programs can have serious consequences, including increased risk of security breaches, fines for non-compliance and increased overhead costs due to inefficient processes.

- PCI pre-assessment
- PCI prep
- PCI audit defense
