

## Identify what you don't know.

*Ignorance is no excuse when telling a client you've been the victim of a breach. That's why thorough security assessments conducted by proven consultants are an essential part of business today.*

Mainstream Assessment Services identify and protect critical business systems, network infrastructure and information by evaluating all aspects of their current information security posture.

Mainstream Security Assessment Services mitigate crucial risk. Armed with the latest technologies and years of enterprise testing experience, our consultants study your network at every level to identify and analyze a range of vulnerabilities.

With each Mainstream assessment, you'll receive in-depth analysis and documentation detailing your network's critical security gaps and how to close them. From improving your firm's established security controls to complying with regulatory mandates, Mainstream provides the essential support you need to make your network safe and secure.

### Assessment offerings include:
